Thank you for your purchase from Cisco Fishing Systems, Ltd. Your business has helped support USA manufacturing and comes with high quality customer support from our knowledgeable staff in Cleveland, Ohio. Please follow the instructions below to ensure proper and safe installation.

Installation of the Planer Mast

1. Install pulley crossbar: Remove screw and washer from crossbar, also remove screw from top of planer mast. Slide crossbar thru hole in top of mast and install screw thru hole in crossbar. Mount loose pulley using screw and washer onto crossbar.
2. Install deck mounting plate and 1/4" backing plate in desired location on boat.
3. Remove screw from bottom of planer mast. Slide mast into collar on plate and install screw thru the bottom of plate and into the bottom of mast. Align the pulleys to the base and tighten bottom screw, now tighten the four set screws in the collar of the planer mast mount.

The installation is completed.

For your convenience we have provided you with a photo of the control box below. If you have any questions during the installation please contact us and we will assist you with any questions you may have.
